

# Pick To Pack

*"Intuitive solution to reduce operating costs"*

**Pick To Pack** solutions are the ideal choice for successful **order picking** completion. In combination with the **Put To Wall** solution on the front and the **Pick To Pack** solution based on the Pick To Light process on the back of the **sorting panel**, the devices will signal with their light which orders have been fulfilled and are ready to be packed and shipped.

Pick To Pack solutions are the perfect solution for **e-commerce** environments, where companies have a large number of small orders. Elimination of errors in order picking, ensuring the shipment of complete orders.

## MEDIA

## BENEFITS

i

Our solutions are designed to quickly prepare orders and prevent service errors.

ii

Implementing Pick-to-Light systems leads to improved productivity and outstanding user acceptance.

iii

In addition, the integration of our systems with the user's software solution (WMS or ERP) is quick and straightforward.
